YASH PAREEK

AI Engineer · ypareek.ch
+41 76 244 1508 · ml.ypareek@gmail.com · linkedin.com/in/pareek-yash · Geneva, CH

AI Engineer with 3+ years designing and delivering enterprise AI agents and workflow automations in production in sensitive enterprise environments. Proven track record translating complex business requirements into scalable, compliant AI solutions — with hands-on experience in responsible AI governance, agent lifecycle management, and stakeholder-led adoption. MSc in Artificial Intelligence at USI Lugano.

TECHNICAL SKILLS

Languages	Python · C++ · SQL · TypeScript
ML & AI	LLM APIs · RAG pipelines ·MLOps · HuggingFace · LLM Finetuning · LangChain · vLLM · RAGAS · AiPerf LLM Benchmarking
Frameworks	PyTorch · JAX · HuggingFace Transformers · DeepEval · LangGraph · MLFlow
Infra	On-premise deployment · Docker · Kubernetes · GitHub Actions (CI/CD) · REST APIs
Data	Chroma · BM25 · Semantic search · Weights & Biases · SQL Server · Databricks · Grafana

EXPERIENCE

AI Engineer · World Trade Organisation
Geneva, CH | Sep 2026 – Present

- Productionized a multi-agent trade-measure surveillance system with department heads and trade analysts. Scaled it from 7 to 16+ sources; hash-based deduplication cut LLM tokens by 17% and frees ~2 FTE/month.
- Shipped an HS code recommender for member governments (RAG, versioned HS 2022 index): MRR@5 0.95, recall@5 0.97, <3 s latency, ready for future HS revisions.
- Sovereign on-premises AI stack (vLLM embedding and reranking, Weaviate, MinIO). No inference outside the tenant boundary.
- Instituted organization-wide AI governance (Langfuse observability, guardrails): 100% of traces logged across all AI applications.
- Deployed an agentic RAG assistant for internal teams over 5,400+ documents: user-scoped access, metadata filtering, hybrid lexical-semantic retrieval, length-calibrated ranking.

Intern · World Trade Organisation
Geneva, CH | Mar 2026 – Sep 2026

- Prototyped agentic trade-policy surveillance (MCP, Google ADK, FastAPI), automating a fully manual workflow across 7 sources in 6 jurisdictions. Later productionized.
- Engineered a hybrid RAG classifier (BM25 + dense retrieval, RRF) over 10,000+ regulatory codes: 73.6% top-1 at <$0.01/query, with confidence-gated human review.
- Benchmarked Gemma and Qwen models on on-premises GPUs (throughput, TTFT, ITL), for production system

AI Engineer · Perimattic Inc.
Bengaluru | Jan 2023 – Aug 2024

- Deployed conversational AI agents (LangChain) serving 1M+ airport travellers. Integrated with legacy backends at 99.95% uptime.
- Delivered enterprise knowledge agents grounded in Google Docs and SharePoint, giving non-technical users natural-language access to internal knowledge.
- Built an LLM evaluation framework (DeepEval) with regression gates on ML deployments.
- Forecast parking utilization (Prophet) for a UK airport parking operator. The forecasts underpinned dynamic pricing, contributing to 15% revenue growth.

Junior AI Engineer · Freelance
Jaipur | Mar 2022 – Jul 2023

- Built real-time YOLO plate recognition for an airport, cutting processing from ~60 s to <5 s (12×).

PROJECTS

Agentic Observability & SRE MCP Platform

- MCP-based observability service orchestrating AI agents on n8n for automated incident analysis from Sentry and Prometheus logs — production-grade reliability and debuggability for agent-based systems.

LLM Fine-Tuning with QLoRA

- Fine-tuned Gemma 7B using QLoRA; deployed optimized inference engine with TensorRT-LLM and serving over vLLM.

EDUCATION

MSc, Artificial Intelligence · USI Lugano, Switzerland — Sep 2024 – Present

BTech, Computer Science · Rajasthan Technical University — Aug 2018 – Jul 2022
